

# Rapid resp<sup>🕒</sup>nders

The wait is over  
for replacement boilers

# It's cold. The boiler died. Business stopped.

Welcome to a business manager's worst nightmare. The first time they go to turn on the boiler when a cold snap arrives and it's stone cold dead. No heat. No business. Merchandise endangered. Employees sent home. Now they're sweating bullets — even though the temperature's below freezing. So where do they turn?

## Weil-McLain to the rescue

In emergency heating situations like this, it's not just about specs. It's about speed, responsiveness and trust. Depend on Weil-McLain, with the best turnaround time in the business. Our SlimFit<sup>®</sup>, Stainless Vertical Firetube (SVF<sup>™</sup>), and Evergreen<sup>®</sup> high-efficiency condensing boilers are ready to go: on the truck, installed in the space, and bringing on the heat — fast.

## Whatever the application, our boilers answer the call

The exceptionally small footprint of our SlimFit high efficiency boiler makes it the perfect fit for unplanned replacement in smaller commercial buildings — either new construction or retrofit — where space is at a premium and budgets are tight.

The Evergreen high efficiency boiler can be up and running in a hurry and sequenced for precision control and comfort that spans across 24 separate programmable zones. That makes it ideal for low to mid-rise structures requiring diverse heating needs.

The state-of-the-art SVF boiler streamlines set-up and installation, saving time, labor and money. AHRI-certified with industry-leading efficiency, up to 97.1% thermal efficiency\* the SVF combines efficiency, control and durability in one complete package.

\* model dependent

## SVF, SlimFit, & Evergreen: Unmatched for unplanned replacements

- Ready out of the box
- Completely factory-assembled, including heat exchanger and controls
- Run-tested and shipped with manufacturer's test results
- Inventory available for all models

### Minimal time to install in hot water applications:

- Fully operational and producing heat for your building in a fraction of the time it takes for other types of boilers; no onsite assembly or burner mounting required
- Designed for quick and easy installation; narrow enough to fit through a standard doorway without disassembly
- Greater mobility is built in: SlimFit 1000–2000 and SVF models include standard, integrated industrial grade roller casters making them the easiest install in the industry; SlimFit 550–750 boilers can be moved on a furniture cart; Evergreen models can go on a simple hand truck

### It pays to switch to high efficiency

Sometimes an unplanned replacement can be a blessing in disguise. It can lead customers to consider the advantages of our high efficiency boilers, including:

- Earning energy efficiency rebates from state or municipal programs, and/or ratepayer funded rebate programs
- Year over year reductions in energy costs
- State of the art controls for more efficient heat utilization
- Outdoor air reset that lets boilers compensate depending on outdoor temperature, providing better comfort to your building's occupants

### Designed for easy maintenance and a longer life

One of the best things businesses can do to avoid a future unplanned boiler replacement is to implement a regular annual maintenance and inspection program. All maintenance items and serviceable components on SlimFit, SVF, and Evergreen boilers are easily accessible without rigging. Result — instead of facing a winter emergency in the future, you can look forward to:

- Energy savings
- Avoiding future repairs
- Maximizing boiler life
- A more comfortable facility
- Tenant retention
- Increased property value

**Weil-McLain** is a leading North American designer and manufacturer of hydronic comfort heating systems for residential, commercial and institutional buildings since 1881. Weil-McLain has manufacturing facilities in Michigan City, Indiana and Eden, North Carolina, along with regional sales offices throughout the United States and an administrative office in Burr Ridge, Illinois.
