WHOLESALER _____

MECH. CONTRACTOR _____

PART NO. _____

NOTES _____

STANDARD BENEFITS:

Saves Time

Ready to install design reduces average single boiler installation time by two hours or more

Saves Money

Less than the cost of all components, plus assembly time including layout, measuring, cutting, soldering, etc.

Easy Installation

A few quick connections while ensuring proper flow through the boiler

Eliminates Piping Errors

Helps ensure correct piping strategy by incorporating the primary/secondary piping requirements

Provides a Professional Appearance

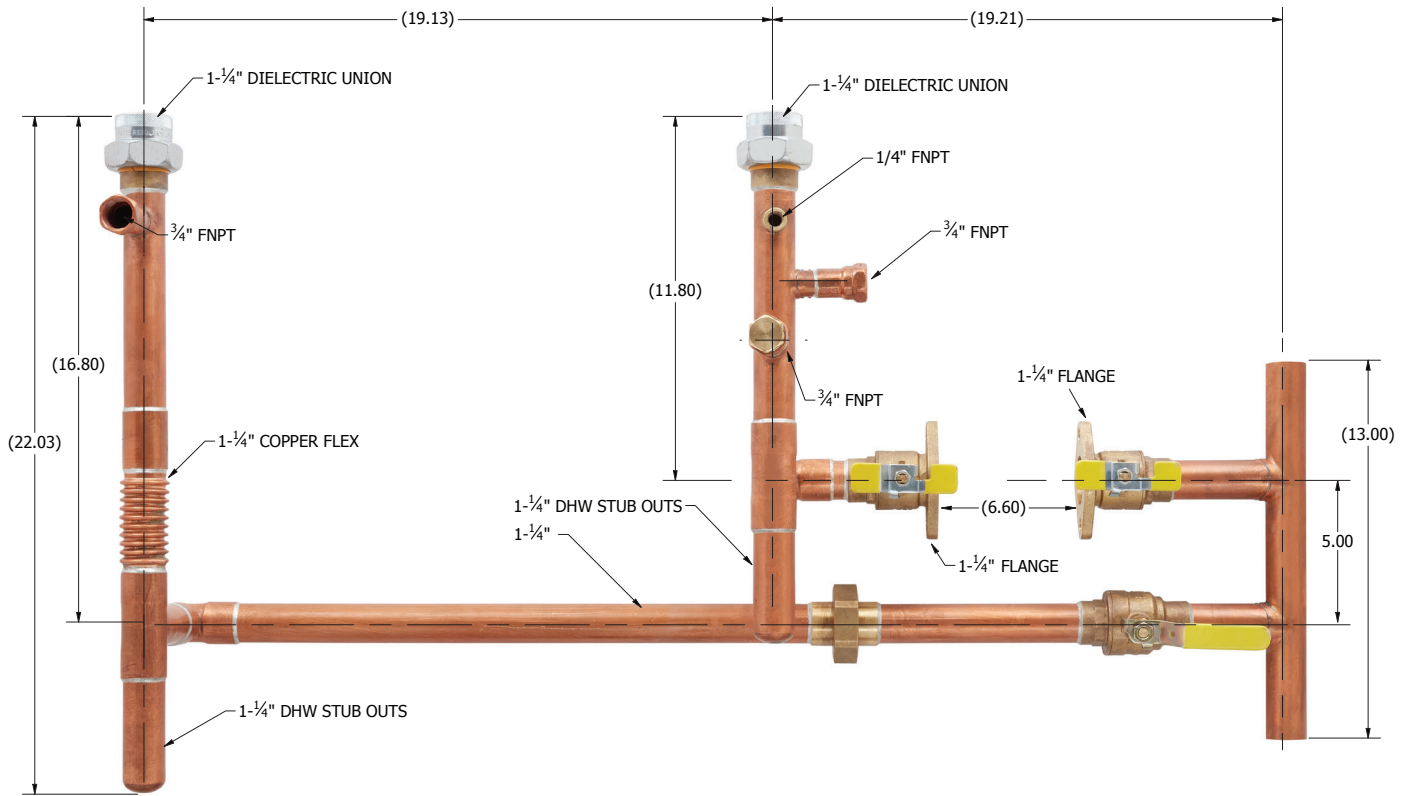

Neat joints, top quality components, designed for a precise and truly aligned installation

Simple System Servicing

Manifold shut off valves provide quick isolation of the boiler and circulator from system piping
