

## Sentinel Rapid Dose Water Treatment Products – Expanded Offering

To: Weil-McLain Distributors, Sales Representatives and Agents

Weil-McLain has offered Sentinel's quality water treatment products since 2009, and have them in both the concentrate gel and liquid forms. We now expanded our lineup to include an aerosol version – Rapid Dose. Rapid Dose makes it even easier to inject into a heating system. For example, a contractor can simply connect and inject through the boiler drain valve with a press of a button.

Both the X100 and X400 formulations are available by case quantities (12 cans per case). A can typically treats approximately 25 gallons of system water. Please see chart below for part numbers and pricing.

Description	WM Item #	Weil-McLain Trade Price
<b>Sentinel X100 Inhibitor Rapid Dose (case/12 cans per)</b>	592-900-037	\$ 396
<b>Sentinel X400 System Restorer Rapid Dose (case/12 cans per)</b>	592-900-038	\$ 411

Our full Sentinel product offering addresses all requirements for cleaning, freeze and corrosion protection of all metals commonly found in hydronic heating systems – steel, copper, brass and aluminum – as well as providing effective scale inhibition. They are designed to be safe with all system components, and overdosing is not an issue. When correctly applied and maintained, they provide complete protection for the lifetime of the system.
