Modified Standard Sidewall Vent Termination Kit – Ultra Gas, WM97+ and GV90+ Boilers

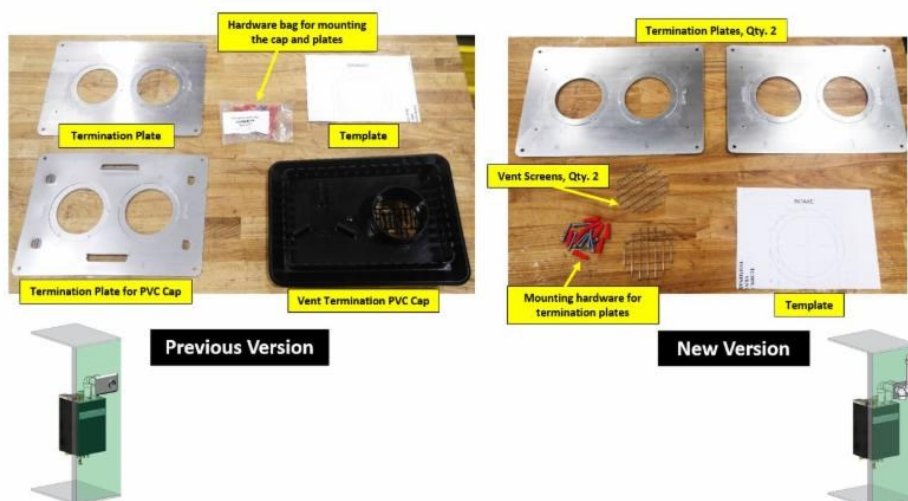

Dear Weil-McLain Distributors, Sales Representatives and Agents:

Our Ultra Gas, WM97+ and GV90+ gas boilers currently ship with a sidewall vent/air termination kit, as standard equipment. Last year we transitioned from including the black Vent Termination PVC Cap, to just the sidewall termination stainless steel plates and bird screens.

The first boilers shipped with the updated vent termination kit are identified in the table below.

Boiler Model	Beginning CP#	Start Date
Ultra Gas Series 3-CT	CP7486839	9/15/2016
WM97+ Series 1	CP7535086	9/16/2016
GV90+ Series 2	CP7537298	9/29/2016

The differences between the previous and new kit versions are shown below.

The previous Sidewall Vent/Air Cap Termination Kit (which includes the black vent termination PVC cap) is still available and can be ordered as an optional kit from our Trade Price Schedule - part #383-500-397 3" kit for UG 80-155, WM97+ and GV90+ boilers; and part #383-500-398 4" kit for the UG 230-399 boilers.
