in Distributors and Contractors:

Weil-McLain's popular AquaBalance gas/water combi boiler is now approved for high altitude installations.

Now homeowners that live at higher elevations can enjoy the benefits of the AquaBalance combi boiler to keep their home toasty while satisfying all domestic hot water needs. The AquaBalance is the perfect solution for people who live in smaller, single family homes, apartments or condos-whether new construction or retrofit.

Please click on the link below to view the AquaBalance Boiler Manual Addendum for High Altitude Installations.

And as recently announced in [Product Bulletin PB-1704](#), the AquaBalance is also approved to utilize flex polypropylene (PP) vent pipe systems by Centrotherm and Duravent-joining the rigid PP option.

Both of these new capabilities of high altitude and flex venting, added to the extensive list of features and benefits, makes the AquaBalance combi boiler an extremely great value at a very affordable price.
