CAUTION
Disconnect power source before installing and/or servicing unit.

NOTES:
1. Thermostat heat anticipator setting must be 0.5 amps.
2. All wiring must be installed in accordance with the requirements of the National Electrical Code and any
   additional national, state, or local code requirements having jurisdiction.
3. All safety circuit wiring must be N.E.C. Class 1.
4. Use only copper conductors for power input wiring.
   Do not use aluminum conductors.
5. For 208 Volt Power Supply, remove orange wire and replace with red wire.
