Commercial Cast Iron DOE Regulatory Transition Update

Dear Valued Commercial Boiler Channel Partner,

Weil-McLain continues LGB and 88 Water new product development to conform to the U.S. Department of Energy regulation 431.87 in which U.S. boiler manufacturer designs (knockdown, assembled block, and complete package configurations) intended for complete boiler installs must meet higher minimum efficiency standards.

Please find the following links to sales collateral to support the design transition to the new, higher efficiency LGB Steam/Water and 88 Water Series 3 designs.
