

## EGH & 94 Family DOE Compliance Transition

Dear Valued Commercial Boiler Sales Network,  
Please find the following commercial cast iron product family announcements as Weil-McLain continues its portfolio transition to conform to the U.S. Department of Energy regulation 431.87 with effective date of 01/10/23.

### Current EGH Series 5 Product Family

We will be discontinuing the EGH whole boiler as the DOE requirements go into effect and we will be offering an LGB equivalent sized product in lieu of it. Based on that, we need to set the present order expectations:

- **EGH 85/95 Boilers:** No change in order submittal at this time as we expect we will have transition inventory past the regulatory effective date. We will have a further announcement when we are close to running out of this inventory.
- **EGH 105/115/125:** Last order deadline of 12/05/22.

*Note: No change to EGH Series 5 replacement section and parts availability.*

### Current 94 Series 3 Product Family

We are in the process of developing a DOE-compliant 94 Steam Series 4 model with expectations it will be in production mid-year 2023. Based on that, we need to set the present order expectations:

- **94 Steam Boilers:** We expect to have limited transition inventory of 1894-S & 2594-S models as a planned bridge to the Series 4 design. Based on that, we need to set a last order deadline of 12/05/22 for 894 thru 1794 and 1994 thru 2494 steam models.
- **94 Water Boilers:** Last order deadline of 12/05/22.

*Note: No change to 94 Series 3 replacement section and parts availability.*

### Last Order Approach:

- Single purchase order.
- Order in excess of one-month historical customer order trends to be filled after smaller channel partner orders.

In the event that orders outpace production capacity, the option to convert existing orders to new design series / alternate product offering or cancel the order at no charge will be at the customer's discretion. If additional production capacity becomes available, Weil-McLain will publish notice to the sales channel.

As always, thank you for your continued support of the Weil-McLain commercial boiler portfolio.

**Michael Doorhy**  
General Manager  
Weil-McLain
