New Series 4 Ultra Boilers

Dear Weil-McLain Distributors, Sales Representatives and Agents:

More exciting news from Weil-McLain, North America's leading boiler manufacturer...

We are now taking orders on our new Ultra Series 4 gas boilers!

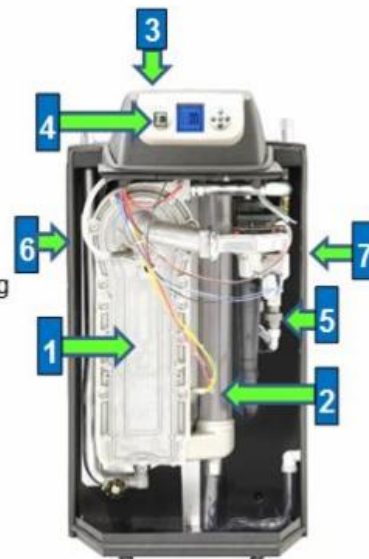

The Series 4 not only has many of the features contractors know and love, but it's now equipped with a new condensate management system and an innovative heat exchanger coating - it's Nanotechnology. Nano coating protects the heat exchanger like "Ultra Armor", repelling and preventing penetration of potentially corrosive condensate and flue gas residue, which is present in all high efficient condensing heating products.

An Ultra boiler series change was made to incorporate these new technologies and enable attractive repositioned pricing. Series 4 Ultra pricing is listed in our recently released Trade Price Schedule (TPS#56), which can be found in the "Distributors" section of our website.

All Ultra Series 4 gas boilers feature the following modifications:

- 1** Nanotechnology coated heat exchanger
- 2** Stainless Steel flue pipe changed to polypropylene
- with condensate shield at base of pipe
- 3** Stainless Steel inlet air adapter changed to polypropylene
- 4** Removed T&P gauge from control housing
- gauge now included for installation in boiler supply piping
- 5** Removed gas shut-off valve
- now field supplied
- 6** Removed handles
- 7** Removed electrical outlet receptacle

The chart below identifies the Ultra part numbers; the standard warranty periods remain the same.

MODEL	PREVIOUS SERIES 3-CT PART #s	NEW SERIES 4 PART #s
Ultra 80 NG	383-500-720	383-500-732
Ultra 80 LP	383-500-721	383-500-733
Ultra 105 NG	383-500-722	383-500-734
Ultra 155 NG	383-500-723	383-500-735
Ultra 230 NG	383-500-724	383-500-736
Ultra 299 NG	383-500-725	383-500-737
Ultra 399 NG	383-500-726	383-500-738
Optional Ultra Easy-Up Manifold Kits*		
For 80 & 105	383-500-649	383-500-765
For 155 - 399	383-500-661	383-500-766
<i>*Series 4 version has an opening/port for the T&P gauge, and is backwards compatible with all Series 3 boilers. Series 3 version is not compatible with Series 4 boilers.</i>

The Ultra is one of the most versatile boilers in the market today, featuring...

- condensing high efficiency performance
- the widest array of venting orientations: direct vent, direct exhaust, sidewall, thru the roof, different pressure zones
- multiple venting material options: PVC, Stainless Steel, *and now approved for rigid & flex polypropylene!*
- U-Control flexibility: contractors can utilize preloaded application settings or customize to their desire

And the list goes on - no wonder it's called "Ultra"!

Do not hesitate. The time is now to take advantage of this opportunity to provide the "Ultra Experience" to contractors and end users alike.

And as always, thank you for your continued support of Weil-McLain products and services.
