

New Direct Exhaust Venting Option for Evergreen 220-399 Boilers

To: Weil-McLain Distributors, Sales Representatives and Agents

Installing an Evergreen boiler just got easier!

Weil-McLain now approves the use of a direct exhaust venting option with the Evergreen gas boilers, sizes 220-399K BTUH input only.

Installing contractors can now direct exhaust through a sidewall, or vertically, while using air for combustion drawn directly from inside the mechanical room (or other means per the Direct Exhaust Venting Kit instructions - the new kit is part # 383-500-769, trade price of \$59).

Please click on the links below to access the electronic versions of the Evergreen Boiler Addendum and the Direct Exhaust Venting Kit Instructions. These will also be posted on our website.
