

New Direct Exhaust Venting Option for AquaBalance 155 Size Boilers

To: Distributors, Sales Representatives, Agents and Contractors

Installing an AquaBalance boiler just got easier!

Weil-McLain now approves the use of a vertical direct exhaust venting option with the AquaBalance 155K BTUH input gas boilers (both combi and heat only models).

Installing contractors can now direct exhaust vertically, while using air for combustion drawn directly from inside the mechanical room (or other means identified in the Direct Exhaust Venting Kit instructions).

Please click on the link below to access the electronic version of the AquaBalance Direct Exhaust Venting Kit Instructions – it is also posted on our website.

If you have any questions regarding this new direct exhaust venting option, please call our Weil-McLain Technical Services Department at 1-800-654-2109 (option 2), or email wmtechnicalservices@weil-mclain.com

And as always, thank you for your continued support of Weil-McLain products and services.
