

Sentinel X100 Inhibitor Water Treatment No Longer Included with Select Boilers

Dear Weil-McLain Distributors,

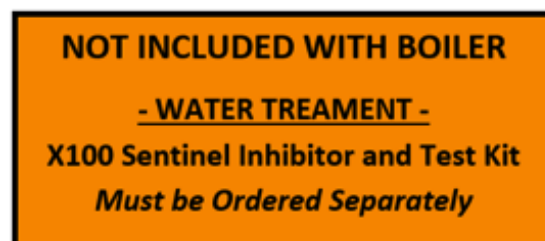

Weil-McLain is no longer including Sentinel X100 Inhibitor and test kit, as standard equipment, with select boilers. We have been including, and training on the benefits of, the Sentinel X100 water treatment product since 2009 - and now provide you the opportunity for added sales in concentrate tube, aerosol can or liquid forms.

The use of Sentinel X100 inhibitor is still required for these boilers; please refer to the current Weil-McLain Trade Price Schedule (TPS#57, page 78) for X100 part numbers and pricing.

The chart below identifies the starting CP numbers of boiler models without the Sentinel X100 inhibitor and associated test kit. We have just started shipping these boilers.

Boiler Model	ECO	WM97+	Ultra	Evergreen		SlimFit
Boiler Sizes	All	All	All	70 - 155	220 - 399	550 & 750
Starting CP #	CP7641876	CP7641960	CP7655475	CP7642026	CP7656532	CP7659071

We have added a new label positioned next to the existing printed CP labels, as illustrated below, as another way to identify that the boiler shipping carton does not include the X100 inhibitor and test kit. Please rotate your stock accordingly.

Note: Our AquaBalance boilers will continue to include the

Sentinel X100 inhibitor and test kit.

As always, thank you for your continued support of Weil-McLain products and services.
