Saves Contractors Time!

New Prefab Manifold Kits for Evergreen Boilers

Weil-McLain now offers two versions of prefabricated manifold kits for the Evergreen gas boilers.

Not only do they save contractors time, the new Evergreen Easy-Up Manifolds take the guess work out of the near boiler piping design, while insuring proper flow through the boiler and proper set up of the primary/secondary piping requirement.

Our high-quality copper manifolds feature dielectric unions, isolation valves, adapters to match piping, and spun ends for easy connection to indirect-fired water heaters (if desired). The manifolds also have openings/ports for a circulator, low water cut off, relief valve, temperature/pressure gauge, and drain valve – which all of these individual components are supplied with every Evergreen boiler.

Benefits to the contractor include:

✓ ☐ Saves Time - ready to install design reduces average installation time by two hours or more

✓ ☐ No Piping Errors - manifolds designed & engineered exclusively for Evergreen boilers, no call backs associated with near boiler piping flow issues

✓ ☐ Professional Appearance - neat joints, top-quality components, precise measurements

✓ ☐ Priced Right - a true value when considering the cost of all components, assembly time, and opportunity to quickly move on to other installation steps

In stock now and available for immediate shipping!

Evergreen Prefabricated Manifold Kits		
For Boiler Sizes	Part #	Trade Price
70-220	383-900-125	\$ 727
299-399	383-900-126	\$ 740
