

## Evergreen 70 Size Boiler Discontinued

Dear Weil-McLain Distributors,

Due to an unfortunate sudden supplier issue, Weil-McLain is discontinuing the 70 MBH input size Evergreen gas water boiler immediately, part # 383-900-004. Service parts will continue to be available. The remaining boiler sizes **(110, 155, 220, 299 and 399)** are unaffected, and will continue to be available.

### Alternatives:

Weil-McLain has a wide selection of product alternatives to choose from for the 70 MBH size range.

- ECO Tec 80, **Part # 383900153** – Our new stylish ECO Tec 80 boiler features a touch screen control with the same intuitive navigation as the Evergreen, and at an attractive price point.
- AquaBalance 80, **Part # 383100035** – Compact design, available in both a heat only and combi version.
- Ultra 80, **Part # 383500732** (Natural Gas) & **Part # 383500733** (Propane Gas) – Our versatile Ultra floor standing boiler can also be wall mounted, and with the widest array of venting capabilities, it's a solution for any installation challenge.
- Evergreen 110, **Part # 383900005** – If you wish to stay within the Evergreen family, our 110 MBH input size features a 5 to 1 turndown ratio, which enables the boiler to automatically modulate down to match any heating demand.

We apologize for any inconvenience. We will contact customers within the next week to make necessary changes on existing orders we are unable to fulfill.
