

Evergreen Boilers Transition to New Evergreen Pro Color

Valued Distributor,

Starting in February, Weil-McLain will implement a few minor changes to the Evergreen line of gas boilers.

Minor changes include:

Addition to name - from Evergreen to Evergreen Pro, to help further emphasize the capability of its powerful commercial grade control

- However, the official ratings, boiler rating labels & agency listings remain as “Evergreen” (AHRI, ENERGY STAR®, Mass Board, SCAQMD, etc.)

Door color - from tan to slate gray, to align with the new color scheme of the product portfolio (consistent with CG, GO, SVF)

Warranty coverage

- Residential & Commercial - from “non-transferable” to “transferable to subsequent owner”
- Residential Parts - from standard 5 years, to 5 years with registration (2 years without)

Shipping carton graphics (see below)

Simplified and combined non-critical service part kits (cabinet gaskets, internal vent pipe pieces, etc.), making it easier for service support with less SKU's

Everything else remains the same...the same boiler series and part numbers. The sizes remain the same – 110, 155, 220, 299 & 399, and all sizes are capable to operate on Propane Gas with the optional conversion kits.

Click on links below to view updated Evergreen Pro literature.

Residential Warranty

Commercial Warranty

Since the boiler part numbers will remain the same, we have added visual markings to the Evergreen Pro shipping cartons.

Boiler Sizes 110-155

Boiler Sizes 220-399 (label on all 4 sides)

We will start shipping the Evergreen Pro when they become available, and a beginning CP number will be provided in a future communication, when known.

Since this is a visible change to contractors, we will not post the Evergreen Pro boiler images on our website, or actively promote the new color for a period of time. This will

allow you to communicate the transition to your customers, as you determine.

As always, thank you for your continued support of Weil-McLain products and services.
