

Commercial Cast Iron Boiler DOE-Compliant Design Transition Update

Valued Commercial Boiler Sales Network,

As per marketing bulletin MB2206 issued to the field on August 02, 2022, the order submittal window for the following boiler models closes today. For clarification, this deadline includes orders for knockdown boiler, sub-assembled section and packaged boiler configurations intended for complete boiler installation.

This deadline is required to enable shipment prior to the Department of Energy 431.87 regulation effective date of 01/10/23 which was re-confirmed earlier this month as the Air Conditioning, Heating and Refrigeration (AHRI) submittal for a stay of motion was denied by the U.S. District Court of Appeals for the D.C. Circuit.

As a reminder, orders for repair/replacement sections to support existing boiler installs will still be accepted.

- LGB Family Series 2 steam and water boilers
- 88 Family Series 2 water boilers

Note: There are no changes planned for the current 88 Family Series 2 Steam boilers as it already meets the upcoming DOE regulatory requirements.

Find the following links to the LGB Series 3 and 88 Water Series 3 part number and pricing addendums to TPS 63. Order entry for these new models/part numbers will start on 09/01/22. To ease transition to the field, Weil-McLain is holding pricing for like-for-like configuration new series models at this time.

Every effort will be made to ship all open orders prior to 01/10/23. In the event that orders outpace production capacity, the option to convert existing orders to the new design series / alternate product offering or cancel the order at no charge will be at the customer's discretion.

As always, thank you for your continued support of the Weil-McLain commercial boiler portfolio.

Michael Doorhy
General Manager
Weil-McLain
