

Announcing B20 Biofuel Certified Residential Oil Boilers

Weil-McLain Distributors, Sales Representatives and Agents:

As promoted at the AHR tradeshow in February, and recently at the Eastern Energy Expo, Weil-McLain's industry-leading residential Ultra Oil, WGO, WTGO and SGO oil boilers are certified for use with B20 biodiesel, when used with approved Beckett and Carlin oil burners.

Blending traditional #2 fuel heating oil with 20% volume of a renewable source has many advantages, including the following:

- Reduces greenhouse gas emissions – better for the environment
- Reduces America's dependence of foreign oil – approved Bio additives are Made in the USA
- Eligible for a federal tax credit – for ENERGY STAR® rated models installed from 1/1/23 through 12/31/26
- No oil burner adjustments necessary – easy transition between #2 fuel heating oil and a B20 blend

All residential Beckett AFG and Carlin EZ oil burners shipped from Weil-McLain since March 2021 are B20 ready.
