

WTGO

Provides space and domestic hot water heating.

APPLICATIONS INCLUDE:

- Residential
- Light Commercial
- Multiple Boilers
- Indirect-fired Water Heating

⁴Boiler model suffixes:

R = Reduced input version—a burner nozzle change may be required, refer to the burner instructions or boiler's rating label for correct selection. No separate/additional damper kit required.

D = High input version—installation of the separate High Input Vent Damper kit (part # 381800515) is required, also a burner nozzle change may be required, refer to the burner instructions or boiler's rating label for correct selection.

RD = ENERGY STAR 87% AFUE compliant only when installed with the separate ES Vent Damper kit (part numbers 381800501 through 381800506) and at the reduced burner rate.

L = Designates a boiler with a special narrow front section (1 1/2 supply tapping) for space constraint installations (i.e., Levittown).

⁵No. 2 fuel oil—Commercial Standard Specification CS75-56. Heating value of oil-140,000 BTU/Gal.

⁶Based on standard test procedures prescribed by the United States Department of Energy.

⁷MBH refers to thousands of BTU per hour.

⁸AHRI gross output.

⁹Net AHRI ratings are based on net installed radiation adequate for the requirements of the building, including a piping and pickup allowance of 1.15-sufficient for normal conditions. Provide additional allowance only for unusual piping and pickup loads.

¹⁰Tankless heater rating is in gallons of water per minute, heated from 40°F to 140°F with 200°F boiler water temperature-tested in accordance with I-W-H testing and rating standard for indirect tankless water heaters test with boilers.
