...

ECO® Tec is available in four heat only sizes, from 80 to 199 MBH, and three combi sizes, from 110 to 199 MBH. The 199 size can generate up to 5.4 GPM and is able to satisfy two showers, a faucet, and a dishwasher at the same time—making it the premium residential combi from North America's leading boiler manufacturer. While some other products may only offer one setting, we know that's not enough. The ECO[®] Tec control has several different domestic hot water modes to choose from to maximize energy savings and/or comfort - ranging from the most efficient mode, to preheat, high performance or our own ECO BOOST[™] technology. Learn more at: <https://www.weil-mclain.com/eco-tec>

The New **ECO[®] Tec**

Featuring ECO BOOST Technology

The image shows a black and white ECO Tec water filtration system. The top half is black and features a digital display. The display is divided into two columns: 'PRIORITIES' and 'INPUTS'. The 'PRIORITIES' column has three rows: '1ST' (blue), '2ND' (green), and '3RD' (yellow). The 'INPUTS' column has two rows: '1ST' (blue) and '2ND' (yellow). The bottom half of the unit is white and features a silver-colored rectangular logo with the text 'ECO-TEC'.

PRIORITIES		INPUTS	
1ST	Water	1ST	Water
2ND	Water	2ND	Water
3RD	Water	2ND	Water
