

TO: All Weil-McLain Distributors and Agents
FROM: Scott Schreeg – Commercial Marketing Manager
SUBJECT: *Weil-McLain indirect-fired water heaters are approved as an ASME equal*

As of June 14th 2007 the Massachusetts Plumbing Board has approved the Weil-McLain indirect-fired water heater line as an ASME equal for applications that require an ASME water heater. This allows the Weil-McLain indirect-fired water heaters to be the best solution for applications exceeding the 200,000 BTU and/or 120 Gallon storage restrictions in commercial applications. No need to order expensive custom ASME tanks to meet code.

Weil-McLain Indirect-Fired Water Heaters are the best solution for domestic hot water production:

- Limited 15-year warranty on Commercial sizes (lifetime on residential)
- Durable jacket with 2" of insulation resulting in stand-by heat losses less than ½ degree per hour
- Excellent recovery performance for an endless supply of domestic hot water
- The best support and service in the business

The following link is on the 'what's new' page off the www.weil-mclain.com homepage which highlights the certification:
