**WEIL-McLAIN
EXCLUSIVE !**

**SUBJECT: The New HydroStat is Standard Equipment on
WGO & WTGO Residential Oil Boilers**

In a collaborative effort with Hydrolevel, Weil-McLain helped to develop the industry's first combination low water cut off & universal temperature limit control — The HydroStat. We are the only boiler manufacturer able to feature the HydroStat – a Weil-McLain exclusive.

With most states now requiring low water cut-offs, the HydroStat provides a simple and quick alternative to installing two controls during new and replacement boiler installations.

During the past two weeks, we phased in the HydroStat in place of the Honeywell electronic aquastat controller on the WGO and WTGO boilers. Any WGO boiler after CP# 5752648, and any WTGO boiler after CP# 5752664, have the new HydroStat component. To further identify the change once the boiler is crated, a small blue dot label has been added to the outside of the crate near the CP label.

The one HydroStat service part # 381-356-530, trade price of \$149, replaces both Honeywell aquastat part numbers (WGO # 570-311-045, WTGO # 570-311-050). The HydroStat can be mounted on existing Honeywell immersion wells for field replacements - please note, it will only provide the same functionality of the control being replaced. To gain the LWCO feature on existing field-installed boilers, the immersion well must be replaced with an Electro-Well.

The Electro-Well service part for the WGO is # 592-300-026, trade price of \$15.
The Electro-Well service part for the WTGO is # 592-300-027, trade price of \$19.

When combined with other recent improvements of the WGO & WTGO boiler models,

- New pressure & temperature gauges (with black face dial)
- Switch to Field Controls barometric vent dampers (collar included)

it makes Weil-McLain's high quality Gold Oil boiler line a hard value to beat!

If you have questions, please contact your Weil-McLain sales representative or area sales office.

And as always, thank you for your continued support of Weil-McLain products and services.
