

TO: All Weil-McLain Distributors and Agents

FROM: Tony Curran, V.P. of Sales

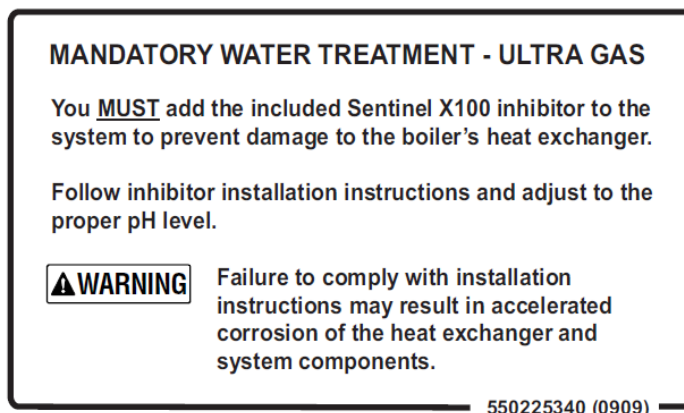

SUBJECT: **Ultra Gas Water Treatment – Inhibitor Now Included With All Ultra Gas Boilers**

Beginning September 16, 2009, Weil-McLain will be shipping a corrosion inhibitor and a quick water test kit in the crate with all Ultra Gas boilers. The included Sentinel X100 inhibitor is suitable for all various water qualities, both hard and soft, and provides additional benefits for full system protection.

This inhibitor is a general purpose treatment for total protection against corrosion, scale, hydrogen gassing and boiler noise in all types hydronic heating systems, including those containing aluminum. It will extend the life of the system; ensure maximum boiler efficiency and minimum fuel usage. Once added, Sentinel X100 never needs to be replaced unless system water is added or replaced.

Ultra Gas models 80, 105, 155 will contain one tube of inhibitor and one quick test kit; and Ultra Gas models 230 and 310 will contain two tubes of inhibitor and one quick test kit.

The following warning label will be on all inhibitor kits and all Ultra Gas boilers:

As part of our introductory program, your Weil-McLain Field Sales Representative will be contacting you within the next week to confirm your existing inventory of Ultra Gas boilers. Inhibitor and quick test kits for your existing inventory will be shipped free of charge beginning September 28, 2009.

Additional inhibitor kits for your service parts inventory may be ordered under the following part numbers:

Part Number	Description	Service Parts Price
540-131-052	1 tube of inhibitor and 1 test kit	\$30.00
540-131-053	2 tubes of inhibitor and 1 test kit	\$55.00
540-131-054	3 tubes of inhibitor and 1 test kit	\$80.00
592-900-002	1 tube of inhibitor only	\$25.00
592-900-005	1 quick test kit only	\$5.00
