

TO: All Weil-McLain Distributors and Agents
FROM: Mike Boyd – Product Marketing Manager
SUBJECT: **New Ultra Venting Option – Direct Exhaust**

Installing an Ultra Gas boiler just got Ultra easier!

Weil-McLain now approves the use of a direct exhaust venting option with Ultra Series 3 and Series 3-UE boilers, which includes the following models: 80, 80LP, 105, 155, 230, 299, 310, 399.

Installing contractors can now direct exhaust through a sidewall, or vertically, and use combustion air drawn directly from the mechanical room. The drawings below illustrate these venting configurations.

Soon, all Ultra Series 3-UE boilers will ship with the new venting addendum which provides detailed installation instructions for the direct exhaust option.

An electronic version of this new venting addendum is posted on our web site and can be downloaded at <http://tiny.cc/f8o08>

If there are any questions regarding this new direct exhaust venting option, please do not hesitate to call Weil-McLain Technical Services at 1-800-526-6636.

And as always, thank you for your continued support of Weil-McLain products and services.
