FROM: John Kopf – Sr. Commercial Product Manager

SUBJECT: **Discontinuation of PFG Boiler Line**

The DOE has published a final ruling on minimum efficiency levels for commercial boilers. According to this document, any boiler manufactured on or after March 2, 2012 and intended for sale in the U.S. must meet the requirements in Table 1 from 10 CFR 431.87, as shown below:

| Boiler Type | Gas Fired | | | | Oil Fired | | |
|------------------------|--------------------------------------|-------------------|------------------------------|-----------------------|--------------------------------------|-------------------|----------------|
| | Water | Water | Steam (except natural draft) | Steam (natural draft) | Water | Water | Steam |
| Input | ≥300,000 Btu/hr ≤2,500,000 BTU/hr | >2,500,000 BTU/hr | ≥300,000 BTU/hr | ≥300,00 BTU/hr | ≥300,000 Btu/hr ≤2,500,000 BTU/hr | >2,500,000 BTU/hr | ≥300,00 BTU/hr |
| New Minimum Efficiency | 80% thermal | 82% combustion | 79% thermal | 77% thermal | 82% thermal | 84% combustion | 81% thermal |

PFG boilers

Based on this DOE requirement we are discontinuing manufacturing of our PFG Commercial Gas Boiler line effective immediately. This product will be shown in the discontinued portion of the AHRI listing and will be available for sale until all existing inventories are depleted. We will continue providing technical support, parts replacement and service for the PFG line as long as deemed necessary.

We will continue accepting orders for the PFG boilers on a first come basis. Please contact Weil-McLain customer service for PFG availability.

If you have any questions, please contact your local Weil-McLain sales representative.

Thank you for your continued support of Weil-McLain products and services.
