

**TO:** All Weil-McLain Distributors and Agents  
**FROM:** Mike Boyd – Product Marketing Manager  
**SUBJECT:** **New Series of EG Residential Boilers – Series 5**

As previously communicated in Marketing Bulletins MB-1201 (1/31/12), MB-1205 (2/29/12) and MB-1214 (7/18/12), Weil-McLain planned to, and did change from Series 4 to Series 5. The series change was necessary to comply with the Energy Independence and Security Act of 2007 for products manufactured after August 31, 2012.

Our Trade Price Schedule TPS #51 reflects EG and PEG boilers modified to meet code standards with new nine-digit part numbers.

The EG section assemblies, draft hoods, vent dampers, tankless heaters and high altitude conversion kits part numbers did not change and can be used for both Series 4 and 5.

For all other components, they are not backwards compatible and cannot be mixed between series. Please use our previous TPS#50 as a guide for all Series 4 components, and TPS#51 for Series 5.

For more information, please contact your local Weil-McLain Sales Representative.

And as always, thank you for your continued support of Weil-McLain products and services.
