

**TO:** All Weil-McLain Distributors and Agents  
**FROM:** Mike Boyd – Product Manager  
**SUBJECT:** **Lead Free - Weil-McLain Products Comply with the Reduction of Lead in Drinking Water Act**

As of January 4, 2014, all plumbing fixtures introduced into commerce must be lead free as defined by the **Reduction of Lead in Drinking Water Act** unless they are exempt because:

- (1) they are used exclusively for nonpotable services and not anticipated to be used for human consumption or
- (2) they are toilets, bidets, urinals, fill valves, flushometer valves, tub fillers, shower valves, service saddles, or water distribution main gate valves that are 2 inches in diameter or larger.

The act defines the term “lead free” as:

- (1) not containing more than 0.2 percent lead when used with respect to solder and flux; and
- (2) not more than a weighted average of 0.25 percent lead when used with respect to the wetted surfaces of pipes, pipe fittings, plumbing fittings, and fixtures.

The following Weil-McLain products have been tested and certified by CSA Group (certificate # 2552127). There are no changes required on our products or their components (all inclusive, certified as is)-hence all listed products previously shipped to customers already comply.

**Indirect-fired water heater tank models:**

WM97+® Aqua Logic™ (CWH) and Aqua Plus® 35, 45, 55, 85 and 105

**Tankless water heaters for Weil-McLain boiler models:**

CGt™, EG™, EGH™, 80, 88, 94, WTGO™, P-WTGO™-3L and SGO™

Even though marking products that comply with the act is not required, we will soon transition and apply the CSA mark to our indirect-fired water heaters and tankless coils.

For more information, please contact your local Weil-McLain Regional Sales Office.

And as always, thank you for your continued support of Weil-McLain products and services.
